Wellington Lions

Exploring the Wild Side

Wellington Lions Primary Academy explores the wild side of nature. Exploring the world, adaptation, and survival.

Year 5 and 6 pupils at Wellington Primary Academy have been learning about how animals and plants survive and adapt to their environments. Pupils were set the task to research their chosen animal in groups and create posters to showcase their hard work.

Animals from all around the world were discussed, some animals who are considered an endangered species or whose habitats are being affected by environmental issues. From a couple of our groups we had Giraffe's, emperor penguins and camels, all from different parts of our world.

Within the groups, they discussed their own environmental issues and what could affect their habitats, their food source and how they are adapting to those constant changes. All of the posters had their own great quirk and were all powerful with their presentation, every single poster had a different approach to their designs, the pupils had used a spider web design with others used a simple but powerful table.

Charities such as World Wildlife (WWF) and David Attenborough have had a massive impact on the world with their missions to tackle the issues that our animals face with our ever-growing world.

With David Attenborough gracing our TVs with beautiful up close and personal encounters of animals in their natural habitat and how global changes is affecting them and WWF doing behind the scene work to try conserve, clean and safeguard the animals and their habitats.

Jake Bailey Head of School commented "The impact that we have on the environment is huge and teaching the children of our future is key. It can also be an exciting opportunity for the pupils to learn more about their favourite animal and ways they can change any habits to help protect their environment such as helping recycle or to not drop their litter. In the Wellington Primary Academies we find it important to help teach our children the importance of looking after our planet, why and how it can impact us all if we do not."

This Academy is proud to be a part of the Ascend Learning Trust, to find out more please visit www.ascendlearningtrust.org.uk
